

FEATURES

- 440,000 BTU maximum boiler size
- 3.8 gallons per hour maximum flow rate
- 100° F maximum operating temperature
- Premium media blend of calcium carbonate and magnesium carbonate
- Kit includes 1/2-inch FNPT with adapters for 1/2-inch hose barb and 3/4-inch PVC socket connections
- The low-profile design connects directly to the drain line
- Complies with local plumbing codes requiring acid neutralization and reduces the risk of wastewater violations
- Replacement media kit available
- Made in USA

*Condensate drain lines shall be equipped with CondensateRx devices to neutralize the acidity of the condensate prior to discharge. CondensateRx devices should be installed per the included instructions and comply with all local, state and federal regulations.

INSTALLATION ORIENTATION

CondensateRx needs to be installed either vertical or horizontal with a slight downward pitch at 1/4" minimum
